

The DHCD State Building Codes Office completed a 14-month energy and compliance assessment last June in an effort to benchmark compliance as it relates to the 2009 International Energy Conservation Code. With the cooperation and collaboration of 20 participating Virginia localities DHCD is able to set forth a plan of support, training, and education for key stakeholders in the code enforcement and related industries that furthers Virginia's efforts in energy arena. For additional information regarding our Energy Assessment and Code Compliance Program read the Program Recap report or contact Larry Brock at [larry.brock@dhcd.virginia.gov](mailto:larry.brock@dhcd.virginia.gov).
